FIVE YEAR PLAN **CURRICULUM DEVELOPMENT AND EDUCATIONAL SERVICES**

The long-range plan containing the five-year prescribed schedule of activities is developed by a consortium of faculty, administrators, parents, students, community representatives and Board of Education members. Our priorities development process and plan(s)-of-action prepared for the New Jersey State Department of Education assure a mandatory, cyclical, and comprehensive review of the entire educational program. These are effected pursuant to local procedures for curriculum and educational services development. The flexible planning guide is updated annually in order to assess its progress and timeliness for all future program implementation. The Priorities Committee of the Board of Education annually reviews all tentative considerations for effecting education priorities for each upcoming school year. A thorough review of the Superintendent's Advisory Report (teacher-developed recommendations), administrative input, community and parental concerns and Board considerations, is undertaken at that time. Plans are developed via evaluation of the continuing priorities to systematically review all previous years' curricula development after their adoption(s) by the Board of Education. Each year's Local District Planning Model's analysis of results, and their implications, articulation meeting reviews, and reports developed from the district's continuing priorities culminate each program.
