# Energy Options

## Renewable Energy

- Solar
- Wind
- Solar / Thermal
- Geothermal

## Traditional

- Utility provided gas/ electric

# Photovoltaic Solar Systems

## Panel Types

- Crystalline (Silicon), 15-18% efficient
- Thin-Film, 6-9% efficient, flexible
- Roof, ground or canopy mount installations

## Why Solar?

- Economic: reduces energy purchase cost
- Economic: generates revenue (REC's)
- Environmental: reduces fossil fuel use
- Social: educational tool for students

# Solar Considerations

## Building Orientation

## Roof Installations

- Trees, walls, chimneys, etc
- Mechanical equipment & vents
- Clearances & fall protection
- Age/condition of roof & structure
- Wind uplift requirements
- Fire fighting considerations

## Ground Installations

- Security & maintenance
- Potential concerns from neighbors

# Solar Design Considerations

## PV and Racking Systems (Roof)

- Ballasted, 'dead-weight' systems
- Grouping for operation & wind resistance
- Eliminates roof penetrations
- Removable
- Compatible with roof warranties
- Light weight (4 - 9 lbs/sq. ft.)

## Ground Installations

- 'Dead-weight' and structure supported
- Tracking systems – higher maintenance
- Fixed systems – canopy or ground

# Solar Design Considerations

## Mounting Options & Equipment

Flat, Ballasted

Canopy Example

Weather Station

Inverter

Flat Roof, Ballasted

Sloped, Anchored

Thin-film, Adhered

Combiner Box

# Solar Benefits

## Economic

### Energy Savings

- Reduce energy purchase costs
- 1 kW hr created = 1 kW hr not purchased

### Renewable Energy Credits (REC's)

- 1 REC  $\approx$  1,000 kW hr produced
- Current value = \$650 per REC
- Rough Translation: 100 kW  $\approx$  \$65,000

## Financial Feasibility Analysis

### District owned Photovoltaic Solar System

**870 kW Photovoltaic System (equates to approx. 983,918 kWh produced)**

**Estimated Construction Cost (roof mounted) = \$3,654,000**

### Annual Financial Savings

**Annual Energy Savings = \$ 129,877**  
**(983,918 kWh x 13.2 cents/kWh)**

**Renewable Energy Credits = \$ 432,960**  
**(984 SREC's x \$440)**

---

**Total Estimated Annual Savings = \$ 562,837**
