ANNUAL REPORT.

The last census of this township and school district shows 815 children of school age, which is an increase of 101 children over those of the previous year. The present enrollment in the public schools is 472, which is an increase of 118 This phenominal increase in school attendance over last year. began early in the present school year and caused a considerable expenditure for putting the Church street building in order and equipping one of the rooms in that building for a second kindergarten school. It also involved the employment of three additional teachers. These increases were made after much deliberation and in accordance with an apparently unanimous public sentiment. The cost of this maintaining of two additional school rooms and three teachers, and the furnishing of each scholar with all school supplies free of charge, which was made compulsory by a law passed since our last annual meeting, makes a larger appropriation for next year necessary. With rigid economy we believe that a special tax of \$6.000 will be sufficient.

The financial report shows that the established custom of spending the income of the park buildings on park improvement has been adhered to. The main transverse road has been graded and made available on the lines skillfully planned by Mr. Downing Vaux and gives some indication of the beauty and value of the park when all the walks and roads are completed. The new road and its sidewalk should be suitably coated this summer.

The Park School building has been equipped with electric lights, primarily for the purpose of making the large auditorium available at all times without the danger involved in using temporarily-placed kerosene lamps. This lighting made possible the course of free lectures, or plain talks, for the benefit of the older school children and of citizens generally. The lecturers have been in all cases our own citizens who talked on practical subjects with which they were exceptionally familiar. To the speakers, Messrs. Hoeber, Prout, Duncan, Geer, Philhower and Van Riper the thanks and appreciation of the community have been expressed by large and appreciative audiences. The discipline in all the schools is decidedly improved and it is believed that parents may safely trust their young children in the schools without fear of moral contamination. It has been a matter of regret that the principal and the trustees have been compelled to resort to extreme measures in several cases in order to secure this result.

The flag drill and salutation of the American flag, as formulated by the late Colonel Balch of the United States army, is a daily feature of the opening exercises of the primary schools. The fire drill is so perfected that every child in the Park schools can be marched out in an orderly manner in less than a minute.

The schools of this township are now fully and accurately graded, so that from the Kindergarten to the High school each pupil is in the class where he belongs and each one has the best possible opportunity to advance in proportion to his ability and industry. The system of "departmental teaching" has been successfully established in the eight departments of the Park School building. That is, instead of one teacher staying in one room all day and teaching different branches, each teacher becomes expert in some studies and goes from room to room and teaches those branches of study in which she is most expert. Under the old system, one teacher had charge of one room and one set of pupils all the time, and she taught mathematics, grammar, rhetoric, natural sciences, etc., and naturally could not be a first-class instructor in all of such varied subjects. The new system affords the pupils a change of teachers several times each day. It is working to good advantage and its success here is causing our school to be favorably known in the county and in the state.
